History[PG.1]

Chief Complaint

Patient presents with

- Fever
- Headache

Seen at urgent care yesterday dx with bil ear infections and tonsilitis amoxicillin 400mg prescribed two doses taken mom notes fever does not go down much[PG.2]

Seen at urgent care yesterday dx with bil ear infections and tonsilitis amoxicillin 400mg prescribed two doses taken mom notes fever does not go down much

The history is provided by a grandparent.

Fever

Primary symptoms of the febrile illness include fever, fatigue and headaches. The current episode started yesterday. This is a new problem. The problem has not changed since onset.

The maximum temperature recorded prior to his arrival was 103 to 104 F. The temperature was taken by an oral thermometer.

The fatigue began yesterday. The fatigue has been unchanged since its onset.

The headache began yesterday. The headache developed gradually. Headache is a new problem.

Headache

Associated symptoms include a fever.[PG.1]

Review of patient's allergies indicates:

No Known Allergies

No past medical history on file.

No past surgical history on file.

No family history on file.[PG.2]

Review of Systems

Constitutional: Positive for fatigue and fever.

HENT: Positive for congestion.

Eyes: Negative.

Respiratory: Negative.

Cardiovascular: Negative.

Gastrointestinal: Negative.

Endocrine: Negative.

Genitourinary: Negative.

Musculoskeletal: Negative.

Skin: Negative.

Allergic/Immunologic: Negative.

Neurological: Positive for headaches.

Hematological: Negative.

Psychiatric/Behavioral: Negative.

--^[PG.2]

Physical Exam

Nursing note and vitals reviewed.

Constitutional: He is active.

HENT:

Nose: Nasal discharge present.

Mouth/Throat: Mucous membranes are moist. Tonsillar exudate.

Eyes: EOM are normal. Pupils are equal, round, and reactive to light.

Neck: Neck supple.

Normal range of motion.

Cardiovascular: Normal rate and regular rhythm.

Pulmonary/Chest: Effort normal and breath sounds normal.

Abdominal: Abdomen is soft. Bowel sounds are normal.

Musculoskeletal:

General: Normal range of motion.

Cervical back: Normal range of motion and neck supple.

Neurological: He is alert. GCS score is 15. GCS eye subscore is 4. GCS verbal subscore is 5. GCS motor subscore is 6.

Skin: Skin is warm and dry.

ED Course

Procedures^[PG.1]

Labs Reviewed

COVID/RSV/FLU A&B PCR - Normal

Narrative:

The Xpert Xpress SARS-CoV-2/FLU/RSV plus is a rapid, multiplexed real-time PCR test intended for the simultaneous qualitative detection and differentiation of SARS-CoV-2, Influenza A, Influenza B, and respiratory syncytial virus (RSV) viral RNA in either nasopharyngeal swab or nasal swab specimens.

STREP GROUP A BY PCR

ED Provider Notes (continued)

ED Provider Notes by Gupta, Prashant, MD at 10/15/2023 10:49 PM (continued)

Imaging Results

None

Medications

acetaminophen 32 mg/mL liquid (PEDS) 230.4 mg (has no administration in time range)

ibuprofen 20 mg/mL oral liquid 154 mg (has no administration in time range)^[PG.2]

Medical Decision Making

Flu COVID and RSV are all negative. Grandmother declined strep testing is the patient is already tested positive strep and is currently on antibiotics. The patient also has bilateral ear infections. I advised the grandmother to follow up with the primary care physician and continue the antibiotics. Now that the patient has been dosed appropriately for Tylenol and Motrin, the fever has subsided, and the patient is much happier.

Amount and/or Complexity of Data Reviewed

Labs: ordered.^[PG.1]

ED Course as of 10/16/23 0007

Mon Oct 16, 2023

0001 Patient was under dosed on both Tylenol and Motrin. Now that the appropriate dose has been given, fever is markedly improved in the child is much happier. (PG)
