### Medical Decision Making

Differential diagnosis includes auditory hallucinations, suicidal

--I have looked at previous external notes on patient from previous ed visits and office visits  
 --History was obtained from patient and mother only  
 --I have ordered labs and reviewed them and have gone over results with the patient  
 --I have not ordered radiology studies and reviewed the results and discussed results with patient  
 --Patient's care was not discussed with any type of consultant  
 --Risk of complications and/or mobility or mortality after shared making decision with patient included the use of no over-the-counter medication, the use of no prescribed medication, there is need for hospitalization. And patient's diagnosis or treatment was not significantly limited by social determinants of health care  
 --patient is medically cleared to be transferred to psychiatric facility
